

macphail ecological woods forestry project

Helping Islanders discover the importance of forests by setting an example of stewardship and sustainability.

Happy Holidays from Macphail Woods

Thank you to everyone who has supported or enjoyed our efforts over the last 26 years!

2017 was a fantastic year at Macphail Woods! We've enjoyed a bustling summer camp program, five new School of Woodland Ecology courses, rare plant propagation, Nature Centre renovations, school plantings, over 20 free workshops and much much more.

Here is how you can help over the Holidays!

DONATE NOW

Help us continue to restore, educate and propagate.

RESTORE AN ACRE

Help Island forests thrive for years to come.

A GIFT OF GREEN

Get a Gift Certificate for that loved one who just can't wait for spring.

An Amazing Transformation

Over the last three years, every student from **Eliot River School** has helped to plant over 3,000 native trees, shrubs, wildflowers and ferns!

Picture eight grade four students working together to plant a giant sugar maple outside their classroom windows. These plantings have created windbreaks, pollinator gardens,, outdoor learning spaces and wildlife habitat that will be enjoyed for generations to come.

[Click here to learn more about Schoolground Naturalization.](#)

To carry out this schoolyard naturalization we developed partnerships with the Terry Fox Trail Enhancement group, the Town of Cornwall, the Terry Fox Sports Complex, the Cornwall Area Watershed Group, the TD Bank Greening Streets program, Environment Canada's EcoAction Community Funding Program, volunteer planters, and most importantly the teachers and students of Eliot River School.

“These plantings will be enjoyed by all the wildlife in the area from young students to monarch butterflies to songbirds.”

SPECIES RESTORATION: CANADA ANEMONE

Canadian Anemone (*Anemone canadensis*) is a very rare native wildflower of PEI that is known to grow in only one location in the province. this year, we established specimens into our Arboretum which are already thriving. We have collected seeds will have them for sale in the future.
